

AT-HP® Blue Colour Indicator Guide

The curing colour proof works from +5°C

NOTE: Adhesive colours pictured may vary, use as a guide only. Refer to curing times on page 51.

NOT MIXED

Bright blue,
continue to purge

MIXED

Uniform teal blue,
ready to inject

CURED

Solid grey,
ready to load

AT-HP Blue changes from blue to grey when cured. The colour change process gives a visual indication that the chemical anchor has cured and is ready to load.
