Sometimes you need a fastener that does more. Maybe you're looking for higher loads or additional corrosion resistance, or perhaps an installation method that saves time on a repetitive application. Whatever it is, you are no longer looking for just a fastener, what you are really looking for is a solution.

We have the widest range of solutions of any collated screw driving system on the market. You'll be surprised by how many different collated fasteners we have engineered to meet best quality, for a better product, and better finish.

Doing the job right doesn't have to take more time. Rather than installing individual screws, or other more complicated fastening options, Quik Drive operators can work faster, in most cases from an ergonomic standing position. When time is money, Quik Drive is the faster fastening solution.

Look for the yellow strip. Your guarantee of quality and performance from **Genuine Quik Drive Fasteners**.
