

DWFZ Drywall-to-CFS Screw

The DWFZ is designed for drywall to light gauge steel applications with a sharp point for fast starts, fine thread for steel embedment and a bugle head to cleanly pull down drywall to steel framing.

Features

- Bugle head
- #2 Phillips — BIT2P
- Fine thread
- Sharp point

Application

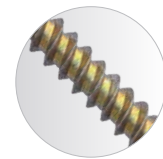

- Drywall-to-light gauge steel
- Maximum recommended board thickness:
25 mm screw — 10 mm; 32 mm screw — 16 mm;
42 mm screw — 45 mm
- Recommended steel thickness 0.5–0.75 mm

Finish

- Yellow Zinc

Bugle head for countersink finish in drywall

Fine thread ideal for drywall to cold form steel applications

Collated Screws for the Quik Drive® System

6 Gauge Drywall-to-CFS Screw

Bit(s) included with every box of screws
