

NEW!

Strong-Drive® SDWH Timber Hex SS Screw

Type 316 Stainless-Steel Structural Screw

Simpson Strong-Tie has expanded its line of load-rated stainless-steel structural wood screws to include larger sizes designed for coach-screw replacement. These 7mm diameter hex-head fasteners require no pre-drilling, making them easier and faster to install than typical coach screws.

Type-316 Stainless Steel
for the maximum corrosion
resistance available

Hex-Washer Head provides
maximum bearing area

Load Values exceed that
of larger diameter
coach screws

No predrilling necessary
in most applications*

Can be used in
ledger applications

Unique "Box" Thread Design
with raised-ridge technology
significantly reduces driving
torque and installation time

Product and Packaging Information

Size Dia (mm)	Length L (mm)	Hex Drive (in.)	Retail Pack ¹		Bulk Pack ¹	
			Fasteners Per Pack	Model No.	Fasteners Per Pack	Model No.
7	100	½	10	T37400TP	100	T37400TTB
7	125	½	10	T37500TP	50	T37500TTB
